

Group 23 Retrospective Sprint Review 2

Achievements

- 100% Get request support
- HATEOAS support
- Front & backend optimization
- Database augmentation

Drawbacks

- Integration not completed
- Different degrees of achievement in personal tasks resulting in progress halt for the whole group
- Presence during standup not always regular meaning daily goals not always achieved

Ideas to Start Pursuing

- Added manpower toward integration of front end and back end.
- Finish use case diagrams.
- Finish list of requirements.
- Focus on user stories.
- Security.
- Have formalised goals for each session as compared to a loose set of features.

Things to Stop Doing

- Not be late to project sessions.
- Sending code without documentation

Ideas to Continue Pursuing

- Continued motivation to finish integration.
- Implementation of a fully functional preliminary log in system.
